

1 Introduction

1. Overview of Statistics
2. Basic Concepts in Statistics
3. Item Collecting, Summarizing, and Presenting Data

2 Probability

1. Probability on Events
2. Event Comparison
3. Probability Functions and Kolmogorov's Axioms
4. Properties of Probability
5. Conditional Probability and Independence
6. Random Variables and Probability Distributions

3 Statistical Inference

1. Framework of Statistical Inference
2. Random Sampling
3. Statistics and Sampling Distributions
4. Measures of Central Tendency and Dispersion
5. Weak Law of Large Numbers
6. Central Limit Theorem

4 Estimation

1. Basic Concepts in Estimation
2. Point Estimation of Mean, Proportion, and Variance
3. Interval Estimation of Mean, Proportion, and Variance

5 Hypothesis Testing

1. Basic Concepts in Hypothesis Testing
2. Hypothesis Testing for Population Means
3. Hypothesis Testing for Population Proportions
4. Interpretation of Statistical Results
